

Sector flavour: Business

Drop-in replacements for the sector-neutral master. Everything else in the template stays the same.

"The people we serve"

→ **our customers, clients, and staff**

Leadership body

→ **the owner / board / leadership team**

Why this policy exists (reference draft)

AI is already in our business — in the emails, the proposals, the research, the back-office admin. Used well it makes us faster and sharper. Used carelessly it exposes client data, produces work we can't stand behind, and puts our reputation and our Privacy Act obligations at risk. This policy sets out how we get the upside without the downside.

Extra conviction framing

Add to conviction 4 (Privacy): *Our clients trust us with their information. That trust is a commercial asset. We protect it accordingly.*

Red-list examples (What we do not do / Privacy)

Client commercial information, pricing and contracts, financial records, employee HR files, anything under NDA or shared in confidence.

Charity note

Not applicable.

Suggested leader roles for adoption block

Managing Director / Owner · Operations or People Lead
