

AI Policy Starter Kit

A plain-language AI policy your team will actually read — built for New Zealand businesses, churches, schools, and not-for-profits. This free sample shows you the thinking. The full kit gives you the editable documents.

The one rule the whole kit hangs on: when in doubt, leave it out.

What we believe about AI — the five convictions

Every policy in the kit is built on five convictions. Here they are in full:

- 1. Human judgment is irreplaceable.** AI assists people; it does not replace human judgment, relationships, or responsibility. The final decision — and the accountability for it — stays with a person.
- 2. People before efficiency.** We will not use AI in a way that degrades the quality of human attention we owe the people we serve.
- 3. Truth and verification.** We verify what AI produces before we rely on it, and never present AI-generated work as something it is not.
- 4. Privacy and confidentiality.** Personal and confidential information about the people we serve does not go into public AI tools — an ethical commitment and a NZ Privacy Act 2020 requirement.
- 5. Shared accountability.** AI use is not a private matter each person navigates alone. It is held together — set by leadership, owned by everyone.

The five questions to ask before you hit enter

- 1. Personal or confidential info** about anyone we serve? → If yes, stop.
- 2. Comfortable being transparent** about AI's role, if asked? → If not, rethink or disclose.
- 3. Verified** it for accuracy and appropriateness? → If not, do that first.
- 4. Replacing human attention** someone deserves? → If yes, choose the person.
- 5. Approved tool?** → If not, check first.

The AI Traffic Light — what data can go into AI?

LEVEL	EXAMPLES	WHAT TO DO
-------	----------	------------

 GREEN — safe	General, non-personal, already-public information	Go ahead. A person still reviews the output.
 AMBER — caution	Internal but not sensitive; de-identify first	Strip names/identifying details before you paste.
 RED — never	Personal, confidential, or legally protected information	Never enter into a public AI tool. Privacy Act 2020.

Inside the full kit (preview)

The paid kit gives you these as editable, ready-to-adopt documents:

1 • Editable AI Policy Template

From this template is all your staff, volunteers is required to report any information or data that is not appropriate to be used in a public space. This is to ensure that the information, content created, and the data and service reports.

What we understand, building and creating content, documents, and content – where a person enters information that is not appropriate to be used in a public space. Information that is not appropriate to be used in a public space, building content, documents, and content – where a person enters information that is not appropriate to be used in a public space. Information that is not appropriate to be used in a public space, building content, documents, and content – where a person enters information that is not appropriate to be used in a public space.

What we understand, building and creating content, documents, and content – where a person enters information that is not appropriate to be used in a public space. Information that is not appropriate to be used in a public space, building content, documents, and content – where a person enters information that is not appropriate to be used in a public space.
